## **Road Work Projects Underway in Clearlake**

**Clearlake, CA – September 25<sup>th</sup>, 2018**

This week represents one of the most extraordinary weeks in the history of the City of Clearlake. For the first time in the City's history, multiple paving projects are underway. The Dam Road Extension project began paving today and will continue for the next several days. The Dam Road Extension project will be the first new major road constructed in the history of the City of Clearlake and will link Woodland Community College and the Walmart shopping area with the "Avenues" connecting at Phillips/18<sup>th</sup> Avenue. This project has been a priority project of the Clearlake City Council and is being funded by Redevelopment bond proceeds.

Granite Construction crews are also at work on the Country Club Road/Kings Lane rehabilitation project and the Pine Street rehabilitation project. Granite Construction has installed new drainage in Country Club and Kings Lane and is in the process of grinding out the existing pavement in order to put down new asphalt. Pine Street has had sidewalk repaired and handicap ramps installed and is ready for new asphalt. Both of these projects are being funded by Measure V proceeds.

In addition, crews from Chrisp Company are out re-striping the main arterial and collector roads in order to make the roads safer for motorists. The Clearlake Police Department is sending out daily Nixle alerts to notify residents where the crews will be out working on the re-striping as the work does impact traffic.

"This is a very exciting time in the City of Clearlake," said City Manager, Greg Folsom. "Not only do we have all these road projects happening right now, but we also have significant grading operations going on with the unpaved roads, and we are working on plans for additional projects for next year and beyond."
